Mexican Resources.

New York, 22.—O. H. LaGrange, formerly sup-rintendent of the San Francisco mint, has just returned from Mexico and is stopping at the St. James Hotel. He speaks enthusiastically of the prospect of developing the recources of Mexaco, by railroads, with \*merican capital. The mines, though not so rich as those of Nerada, will, by the use of economical methods of smalting, now practised in the United States, increased their preduct twenty-fold with the help of railroads.

#### Philp's Confession

Chicago, 22.— Inter-Ocean's New York: No new developments in the forgery case. The report that Philp was about to publish his confession, doubtless grew out of the vellgar pranks of the Truth newspaper. Two or three days ago it announced that it would publish Philp's confession, and tried to stimulate public curiosity. To-day the confession was published and proved to be only a coarse and silly buricagus and a single specimen of its humor will suffice "all of which is turn, so help me John I. Davenport." Philp is evidently anxious to make terms, but the prosecution are not so anxious as he is.

The Alaska Question.

The Alaska Question.

Chicago, 21.—The Inter-Ocean's suggestion is delicately given out at Washington that it migot be well for government to get rid of Alaska by leasing it to the Comme cial Company. It might be as well for government not to restore alavery under such a guise. In the seal fur bless that is where it has practically been done, and miserable Alucts are permitted to sail what they have for sale only to the Commercial Company, and are suffered to buy what they want from that company only, they are put in a condition to be as completely robbed of all the fruits of their inber as though they were under the balave-driver's lash. The lease of the remainder of Alaskan territory signifies an extension merely of that ory signifies an extension of disgraceful state of affairs. on merely of that

The Chinese Trenty.

The Chinese Trenty.

Chicago, 23.—Inter-Ocean's Washington: It is thought the new Chinese treaty is like the bill veloced by the Prandent, limiting the arrival of Chinese on each ship to persons engaged in commercial business and not laborers. Officials of the state department are still relicent. Col. John Hay, assistant secretary of state, now acting secretary during Evart's absence, authorizes a positive and sweeping contradiction of all dispatches purporting to give the general terms of the new Chinese treaty, upon the authority of information alleged to have been received by the state department. He says the state department has not given any information as to the purport of the treaty which is said to have been signed, and that although, of course, it may be safely assumed to be in accordance with the commissioners' in-tructions, any statement purporting to be telegraphed from Washington concerning it is merely imaginary. Your so respondent is also enabled to say that it is in the highest degree implants of the treaty for the commission's instructions confemplated only cl-aring the way for tegislative action by Congress.

Depressed Silk Industry.

Depressed Silk Industry.

New York, 23.—The silk industry in Paterson is somewhat depressed. Most of the mills are running on short time and with reduced face. This trade has not had a dull season before in seven or eight years, and operatives are somewhat alarmed. Manufacturers are at a loss to account for the present dullness, as in former years they were often busy at this time preparing for the spring trade. An unusually abundant crop of raw silk and excessive production are the mort generally received applaced one for the falling off in the demand in all grade. The markets are said to have usen overstocked for some months, and dealers are expected to work off their large supplies in the fall, in which they have been disappeinted. As one consequence many, small manufacturers have been obliged to sacrifice their goods at any figure for add, and this has had a further tendency sacrifice their goods at any figure is sa, and this has had a further tenden cash, and this has had a further tendency to demoralize too market. Certain lines of staple goods are selling to-day at lower prices than over known in the American market, parily on secount of the necessities of manufactures to realize money, and parily because those so start to the product of the fashine. It is hoped that the holdey trade which promises to be unusually briss this year, will, in a great messure, rolleve the market. It is scarcely expected now that these will be any improvement until after the holidays, and probably not before the middle of January of 1st of February. The 15 000 silk operatives in and about Paterson are extremely uneasy.

quainted, came in and entered into conversation with one of them. Averill sail, as nearly as can be remembered: "Is all right? I have just come from Governor's Island. I cannot divulge to you what is going on, but it is a big thing, and is going to tun a this whose thing. Although we lot I fullans, Hancook is going to be elected. D n't you make any mistake about it. This is as cure as you live. There is something to be sprung on the other side. I can't isl you what is, but there is a letter coming out which you will see in the papers. It may be published in two days, or it may be four or five. We are going to send it to the Pacific Coast when it comes out. Garfield cannot carry a single Pacific state. He cannot carry a single Pacific state. He cannot carry a single Pacific that was very emphatic. The goal eman to whom he made his commanciation told the substance of it to his campanion, and the two, whe are republicans, thought nothing further of the matter until about a weak later, at which time they were in Bouton. They saw the Morey letter, and both recognized it at once as the big shing" to wnich Gen. Averill referred. The correspondent is not at liberty to make public the names of the two gentlemen, but they are at the service of the officers of the law, should Gen. Averill fall to remember the conversation and the mystery to which he alluded.

Chicago, 23.—Inter-Ocean: Should the democratic programme be the keeping out if his seat, by a long-winded contest, the successor of General Gardeld in the cenprocured his election to the Senate from Novada by the purchase of the legislature Objection can properly be made to his veing seated on the ground that his elec-tion was procured by bribery. His case is one that wou direquire full as much de-bate before its settlement as could that of Garfield's successor, and so the plot to deprive the republican alde of one vote in the Senate, while interminable debate was continued in the Ohio case, would be balked by the exclusion through the same
